

Teaching a child not to step on a caterpillar
is as valuable to the child
as it is to the caterpillar.

— Bradley Millar

Plants that
butterflies like
also save water.

Choose plants
that need less
water, fertilizer
and pesticides.
This helps
caterpillars
become
butterflies.

Butterflies are self-propelled flowers.

— R. H. Heinlein

Group plants
based on their
watering needs.

This will
allow you to
spend less time
taking care
of your garden
and more time
enjoying your
butterflies!

A garden is a friend you can visit anytime.

Plant
water-conserving
plants. Many
water-conserving
plants look as
lush and green
as water-thirsty
plants.
